

Elite Network

If your technologies can't communicate, you can't communicate.

Elite Network connects your devices, including computers, printers, phones, servers and Internet.

Elite Network includes everything required to enable efficient and secure network access so multiple computing devices can share data and connect to the Internet.

Consumer-class network hardware from box stores is designed for a few hours of daily use with a small number of devices. Elite Network provides business-class network hardware designed for all day, mission-critical commercial use.

It includes a firewall to secure your business against hackers and malware, wireless access points for WiFi coverage anywhere in your office, switches to accommodate your wired devices, business-class warranty, 24/7 monitoring, rapid security incident response and full support of your network and connected devices.

Elite Network includes your Firewall, WiFi Access Points, and Switches as well as the support services listed below

Support
Unlimited real time, fully integrated network support 24/7, assistance connecting new devices and remediation of internal connection issue
Automatic hacker and malware protection enabled by a global Unified Threat Management system
Proactively maintained, firmware updates applied as needed
Monitoring and remediation of Internet connection issues

Elite Network starts at \$145 a month per office site
